SHORT ABOUT

As a new As a junior web developer, my passion for technology started with tinkering with electronics at the age of eight. I have a profound love for frontend development and scripting. My previous work experience working with students with special needs reinforced my attention to detail, spontaneity, and ability to think outside of the box. These skills have inspired me, pushed me forward, and provided me with a profound understanding and willingness to dive deeper into new technologies and web development.

HIGHLIGHTS

- Helped receive funding in an internship
- Developed strategies with a team
-

QUALITIES

- Leadership
- Problem Solving
- Desire to learn
